Objectives - After Attending This Program You Should Be Able To

1. Integrate narrative and communication strategies into clinical and public health practice Learners will be able to apply evidence-based storytelling, digital communication, and trusted-messenger frameworks to improve patient and community understanding of climate-related health risks, counter misinformation, and strengthen trust during climate extremes.
2. Analyze and evaluate multi-level climate and health policies and adaptation strategies Learners will be able to assess federal, state, and local climate actions; identify their impacts on health and health equity; and translate these insights into policy engagement, advocacy, and community partnerships that support resilience and reduce climate-related harms.
3. Implement clinical, community, and systems-level approaches that enhance climate resilience Learners will be able to identify best practices in extreme heat preparedness, disaster mental health support, climate-related displacement response, Indigenous planetary health perspectives, and health sector resilience—and integrate these approaches into clinical care, community engagement, and institutional planning.
